M60F SERIES

**Bent-axial Piston
Fixed Displacement Motor**

M60F series bent-axial piston fixed displacement motor is used in an open or closed circuit. The bent-axial structure ensures a larger displacement and a more compact structure under the same volume.

Apply to open or close circuit

Features

- Higher pressure and higher speed
- High activation efficiency
- Optimized power-weight ratio
- High torque and long service life
- Superior performance in low speed operation provides excellent controllability
- Suitable for engineering machinery and general industrial vehicles

Principle

Speed sensor

The speed sensor is installed on the motor, which can record the motor speed and detect the direction of rotation of the motor.
